

STATE OF MISSISSIPPI AIR POLLUTION CONTROL PERMIT

AND PREVENTION OF SIGNIFICANT
DETERIORATION AUTHORITY
TO CONSTRUCT AIR EMISSIONS EQUIPMENT
THIS CERTIFIES THAT

Hood Industries Inc
Wiggins Mill
1945 South First Street
Wiggins (Stone County), Mississippi

has been granted permission to construct air emissions equipment to comply with emission limitations, monitoring requirements and other conditions set forth herein. This permit is issued in accordance with the provisions of the Mississippi Air and Water Pollution Control Law (Section 49-17-1 et. seq., Mississippi Code of 1972), and the regulations and standards adopted and promulgated thereunder and under authority granted by the Environmental Protection Agency under 40 CFR 52.01 and 52.21.

MISSISSIPPI ENVIRONMENTAL QUALITY PERMIT BOARD

AUTHORIZED SIGNATURE

MISSISSIPPI DEPARTMENT OF ENVIRONMENTAL QUALITY

Issued: August 16, 2000
Modified: JUN 09 2017

Permit No.: 2540-00003

Part I.

A. GENERAL CONDITIONS

1. This permit is for air pollution control purposes only. (Ref.: 11 Miss. Admin. Code Pt. 2, R. 2.1.D)
2. Any activities not identified in the application are not authorized by this permit. (Ref.: Miss. Code Ann. 49-17-29 1.b)
3. The knowing submittal of a permit application with false information may serve as the basis for the Permit Board to void the permit issued pursuant thereto or subject the applicant to penalties for operating without a valid permit pursuant to State Law. (Ref.: 11 Miss. Admin. Code Pt. 2, R. 2.2.B.(5))
4. It is the responsibility of the applicant/permittee to obtain all other approvals, permits, clearances, easements, agreements, etc., which may be required including, but not limited to, all required local government zoning approvals or permits. (Ref.: 11 Miss. Admin. Code Pt. 2, R. 2.1.D.(6))
5. The issuance of a permit does not release the permittee from liability for constructing or operating air emissions equipment in violation of any applicable statute, rule, or regulation of state or federal environmental authorities. (Ref.: 11 Miss. Admin. Code Pt. 2, R. 2.2.B.(7))
6. It shall not be a defense for a permittee in an enforcement action that it would have been necessary to halt or reduce the permitted activity in order to maintain compliance with the conditions of the permit, unless halting or reducing activity would create an imminent and substantial endangerment threatening the public health and safety of the lives and property of the people of this state. (Ref.: 11 Miss. Admin. Code Pt. 2, R. 2.2.B.(15)(a))
7. The permit and/or any part thereof may be modified, revoked, reopened, and reissued, or terminated for cause. Sufficient cause for a permit to be reopened shall exist when an air emissions stationary source becomes subject to Title V. The filing of a request by the permittee for a permit modification, revocation and reissuance, or termination, or of a notification of planned changes or anticipated noncompliance does not stay any permit condition. (Ref.: 11 Miss. Admin. Code Pt. 2, R. 2.2.B.(15)(b))
8. The permit does not convey any property rights of any sort, or any exclusive privilege. (Ref.: 11 Miss. Admin. Code Pt. 2, R. 2.2.B.(15)(c))
9. The permittee shall furnish to the DEQ within a reasonable time any information the DEQ may request in writing to determine whether cause exists for modifying, revoking and reissuing, or terminating the permit or to determine compliance with the permit. Upon request, the permittee shall also furnish to the DEQ copies of records required to be kept by the permit or, for information claimed to be confidential, the permittee shall furnish such records to the DEQ along with a claim of confidentiality. The permittee may furnish such

Part I. (Continued)

records directly to the Administrator along with a claim of confidentiality. (Ref.: 11 Miss. Admin. Code Pt. 2, R. 2.2.B.(15)(d))

10. Design and Construction Requirements: The stationary source shall be designed and constructed so as to operate without causing a violation of an Applicable Rules and Regulations, without interfering with the attainment and maintenance of State and National Ambient Air Quality Standards, and such that the emission of air toxics does not result in an ambient concentration sufficient to adversely affect human health and well-being or unreasonably and adversely affect plant or animal life beyond the stationary source boundaries. (Ref.: 11 Miss. Admin. Code Pt. 2, R. 2.5.A)
11. Solids Removal: The necessary facilities shall be constructed so that solids removed in the course of control of air emissions may be disposed of in a manner such as to prevent the solids from becoming windborne and to prevent the materials from entering State waters without the proper environmental permits. (Ref.: Miss. Code Ann. 49-17-29)
12. Diversion and Bypass of Air Pollution Controls: The air pollution control facilities shall be constructed such that diversion from or bypass of collection and control facilities is not needed except as provided for in Regulation 11 Miss. Admin. Code Pt. 2, Ch. 1., "Air Emission Regulations for the Prevention, Abatement, and Control of Air Contaminants", Section 10. (Ref.: 11 Miss. Admin. Code Pt. 2, R. 1.10)
13. Fugitive Dust Emissions from Construction Activities: The construction of the stationary source shall be performed in such a manner so as to reduce fugitive dust emissions from construction activities to a minimum. (Ref.: 11 Miss. Admin. Code Pt. 2, R. 2.5.A.(4))
14. Right of Entry: The permittee shall allow the Mississippi Department of Environmental Quality Office of Pollution Control and the Mississippi Environmental Quality Permit Board and/or their representatives upon presentation of credentials:
 - a) To enter upon the permittee's premises where an air emission source is located or in which any records are required to be kept under the terms and conditions of this permit; and
 - b) At reasonable times to have access to and copy any records required to be kept under the terms and conditions of this permit; to inspect any monitoring equipment or monitoring method required in this permit; and to sample any air emissions. (Ref.: Miss. Code Ann. 49-17-21)
15. Permit Modification or Revocation: After notice and opportunity for a hearing, the Permit Board may modify the permit or revoke it in whole or in part for good cause shown including, but not limited to:
 - a) Persistent violation of any of the terms or conditions of this permit;

Part I. (Continued)

- b) Obtaining this permit by misrepresentation or failure to disclose fully all relevant facts;
or
- c) A change in federal, state, or local laws or regulations that require either a temporary or permanent reduction or elimination of previously authorized air emission.

(Ref.: 11 Miss. Admin. Code Pt. 2, R. 2.2.C)

16. Public Record and Confidential Information: Except for data determined to be confidential under the Mississippi Air & Water Pollution Control Law, all reports prepared in accordance with the terms of this permit shall be available for public inspection at the offices of the Mississippi Department of Environmental Quality, Office of Pollution Control. (Ref.: Miss. Code Ann. 49-17-39)
17. Permit Transfer: This permit shall not be transferred except upon approval of the Permit Board. (Ref.: 11 Miss. Admin. Code Pt. 2, R. 2.16.B)
18. Severability: The provisions of this permit are severable. If any provision of the permit, or the application of any provision of the permit to any circumstances, is challenged or held invalid, the validity of the remaining permit provisions and/or portions thereof or their application to other persons or sets of circumstances, shall not be affected thereby. (Ref. 11 Miss. Admin. Code Pt. 2, R. 2.1.D.(7))
19. Permit Expiration: The permit to construct will expire if construction does not begin within eighteen (18) months from the date of issuance or if construction is suspended for eighteen (18) months or more. (Ref.: 11 Miss. Admin. Code Pt. 2, R. 2.5.C.(1))
20. Certification of Construction: A new stationary source issued a Permit to Construct cannot begin operation until certification of construction by the permittee. (Ref.: 11 Miss. Admin. Code Pt. 2, R. 2.5. D(3))
21. Beginning Operation: Except as prohibited in Part I, Condition 24 of this permit, after certification of construction by the permittee, the Permit to Construct shall be deemed to satisfy the requirement for a permit to operate until the date the application for issuance or modification of the Title V Permit or the application for issuance or modification of the State Permit to Operate, whichever is applicable, is due. This provision is not applicable to a source excluded from the requirement for a permit to operate as provided by APC-S-2, Section XIII.G. (Ref.: 11 Miss. Admin. Code Pt. 2, R. 2.5. D(4))
22. Application for a Permit to Operate: Except as otherwise specified in Part I, Condition 24 of this permit, the application for issuance or modification of the State Permit to Operate or the Title V Permit, whichever is applicable, is due twelve (12) months after beginning operation or such earlier date or time as specified in the Permit to Construct. The Permit Board may specify an earlier date or time for submittal of the application. Beginning operation will be

Part I. (Continued)

assumed to occur upon certification of construction, unless the permittee specifies differently in writing. (Ref.: 11 Miss. Admin. Code Pt. 2, R. 2.5. D(5))

23. **Operating Under a Permit to Construct:** Except as otherwise specified in Part I, Condition 24 of this permit, upon submittal of a timely and complete application for issuance or modification of a State Permit to Operate or a Title V Permit, whichever is applicable, the applicant may continue to operate under the terms and conditions of the Permit to Construct and in compliance with the submitted application until the Permit Board issues, modifies, or denies the Permit to Operate. (Ref.: 11 Miss. Admin. Code Pt. 2, R. 2.5. D(6))
24. **Application Requirements for a Permit to Operate for Moderate Modifications:** For moderate modifications that require contemporaneous enforceable emissions reductions from more than one emission point in order to “net” out of PSD/NSR, the applicable Title V Permit to Operate or State Permit to Operate must be modified prior to beginning operation of the modified facilities. (Ref.: 11 Miss. Admin. Code Pt. 2, R. 2.5. D(7))
25. **Compliance Testing:** Regarding compliance testing:
 - a) The results of any emissions sampling and analysis shall be expressed both in units consistent with the standards set forth in any Applicable Rules and Regulations of this permit and in units of mass per time.
 - b) Compliance testing will be performed at the expense of the permittee.
 - c) Each emission sampling and analysis report shall include but not be limited to the following:
 - (1) detailed description of testing procedures;
 - (2) sample calculation(s);
 - (3) results; and
 - (4) comparison of results to all Applicable Rules and Regulations and to emission limitations in the permit.

(Ref.: 11 Miss. Admin. Code Pt. 2, R. 2.6. B(3), (4) and (6))

B. GENERAL NOTIFICATION REQUIREMENTS

1. Within fifteen (15) days of beginning actual construction, the permittee must notify DEQ in writing that construction has begun. (Ref.: 11 Miss. Admin. Code Pt. 2, R. 2.5.C.(2))

Part I. (Continued)

2. The permittee must notify DEQ in writing when construction does not begin within eighteen (18) months of issuance or if construction is suspended for eighteen (18) months or more. (Ref.: 11 Miss. Admin. Code Pt. 2, R. 2.5.C.(3))
3. Upon the completion of construction or installation of an approved stationary source or modification, the applicant shall notify the Permit Board that construction or installation was performed in accordance with the approved plans and specifications on file with the Permit Board. (Ref.: 11 Miss. Admin. Code Pt. 2, R. 2.5. D(1))
4. The Permit Board shall be promptly notified in writing of any change in construction from the previously approved plans and specifications or permit. If the Permit Board determines the changes are substantial, it may require the submission of a new application to construct with “as built” plans and specifications. Notwithstanding any provision herein to the contrary, the acceptance of an “as built” application shall not constitute a waiver of the right to seek compliance penalties pursuant to State Law. (Ref.: 11 Miss. Admin. Code Pt. 2, R. 2.5. D(2))

Part II.
EMISSION LIMITATIONS AND MONITORING REQUIREMENTS

Beginning August 16, 2000, the permittee is authorized to construct modifications to air emissions equipment and emit air contaminants from Emission Point AA-004, the 23 Section Veneer Dryer (Hood Ref. No. AA-005). The modifications include:

Extending the three stack heights from 44 feet to 65 feet, and;
Removal of the natural gas fired burner and reinstallation of the steam heating coils in the dryer Zone #1.

The air emissions equipment shall be constructed to comply with the emission limitations and monitoring requirements specified below.

EMISSIONS LIMITATIONS

Opacity 40% as determined by EPA Test Method 9, 40
CFR 60, Appendix A.

All test methods specified above shall be those versions, or their approved equivalents, which are in effect August 16, 2000.

OPERATING LIMITATIONS

For Emission Points AA-004 and AA-007, the permittee shall be limited to a total maximum production of 191 MM sf/yr (3/8" basis) through both veneer dryers.

RECORDKEEPING AND REPORTING REQUIREMENTS

For Emission Points AA-004 and AA-007, the permittee shall record the amount of veneer dried in sf (3/8" basis) on both a daily basis and a consecutive 365-day period total.

Part II. (Continued)
EMISSION LIMITATIONS AND MONITORING REQUIREMENTS

Beginning August 16, 2000, the permittee is authorized to construct modifications to air emissions equipment and emit air contaminants from Emission Point AA-005, the 4-Head Plywood Sander and a 1-Head Sander equipped with a Quad-Pak cyclone (four cyclones in parallel)(Hood Ref. No. AA-024A).

The air emissions equipment shall be constructed to comply with the emission limitations and monitoring requirements specified below.

EMISSIONS LIMITATIONS

Particulate Matter	7.32 lbs/hr and 20.55 tons/yr, as determined by EPA Test Methods 1-5, 40 CFR 60, Appendix A.
PM ₁₀	6.31 lbs/hr and 17.73 tons/year as determined by EPA Test Method 201 or 201A in conjunction with Test Method 202, 40 CFR 51, Appendix M.
Opacity	40% as determined by EPA Test Method 9, 40 CFR 60, Appendix A.

All test methods specified above shall be those versions, or their approved equivalents, which are in effect August 16, 2000.

OPERATIONAL LIMITATIONS

The permittee shall not operate either the 4-Head Plywood Sander or the 1-Head Sander without controlling the PM/PM₁₀ emissions using the cyclones designated in Emission Points AA-005 AND AA-006.

The permittee is authorized to operate Emission Points AA-005 and/or AA-006 a maximum of 5,616 hours/year in a consecutive 365-day period.

RECORDKEEPING AND REPORTING REQUIREMENTS

The permittee shall record the hours of operation of Emission Points AA-005 and AA-006 on both a daily basis and a consecutive 365-day period total. These daily records shall be kept in log form and must be made available for review upon request during any inspection visit by the DEQ personnel.

Part II. (Continued)

CYCLONE CONTROL EQUIPMENT REQUIREMENTS

- 1. Inspections shall be performed each month, or more often as needed, and maintenance shall be performed as dictated by inspection results so that proper operation of the pollution control equipment is maintained. Records of any inspections and/or maintenance shall be kept in log form and must be made available for review upon request during any inspection visit by Office of Pollution Control personnel.**
- 2. The permittee shall maintain on hand at all times sufficient equipment as is necessary to repair and/or overhaul the pollution control equipment. In the event of a failure of the pollution control equipment, the permittee shall cease operations until such time as repairs are made and the proper efficiency of the pollution control equipment is restored.**
- 3. For Emission Point AA-005, the permittee shall demonstrate compliance with PM emission limitations by stack testing in accordance with EPA Reference Methods 1-5, with PM₁₀ emission limitations by stack testing in accordance with EPA Reference Method 201 or 201A in conjunction with Reference Method 202, 40 CFR 51, Appendix M and with Opacity during the stack test in accordance with EPA Reference Method 9 and submittal of a stack test report within 180 days of startup, but not later than 60 days of attaining maximum production rate and biennially thereafter.**

A written test protocol must be submitted at least thirty (30) days prior to the intended test date(s) to ensure that all test methods and procedures are acceptable to the Department. If needed, the permittee may request a pretest conference to discuss the test methods and procedures. The pretest conference should be scheduled at least thirty (30) days prior to the test date. Also, the Department must be notified prior to the scheduled test date. At least TEN (10) DAYS notice should be given so that an observer may be scheduled to witness the test(s).

Part II. (Continued)
EMISSION LIMITATIONS AND MONITORING REQUIREMENTS

Beginning August 16, 2000, the permittee is authorized to construct modifications to air emissions equipment and emit air contaminants from Emission Point AA-006, Sander Dust High Pressure Relay Cyclone located at the wood/bark fired boiler's Fuel House (Hood Ref. No. AA-024B). This cyclone receives dust from the Quad-Pak cyclone.

The air emissions equipment shall be constructed to comply with the emission limitations and monitoring requirements specified below.

EMISSIONS LIMITATIONS

Particulate Matter	1.80 lbs/hr and 5.05 tons/yr, as determined by EPA Test Methods 1-5, 40 CFR 60, Appendix A.
PM ₁₀	1.53 lbs/hr and 4.30 tons/year as determined by EPA Test Method 201 or 201A in conjunction with Test Method 202, 40 CFR 51, Appendix M.
Opacity	40% as determined by EPA Test Method 9, 40 CFR 60, Appendix A.

All test methods specified above shall be those versions, or their approved equivalents, which are in effect August 16, 2000.

OPERATING LIMITATIONS

The permittee shall not operate either the 4-Head Plywood Sander or the 1-Head Sander without controlling the PM/PM₁₀ emissions using the cyclones designated in Emission Points AA-005 AND AA-006.

The permittee is authorized to operate Emission Points AA-005 and/or AA-006 a maximum of 5,616 hours/year in a consecutive 365-day period.

RECORDKEEPING AND REPORTING REQUIREMENTS

The permittee shall record the hours of operation of Emission Points AA-005 and AA-006 on both a daily basis and a consecutive 365-day period total. These daily records shall be kept in log form and must be made available for review upon request during any inspection visit by the DEQ personnel.

Part II. (Continued)

CYCLONE CONTROL EQUIPMENT REQUIREMENTS

- 1. Inspections shall be performed each month, or more often as needed, and maintenance shall be performed as dictated by inspection results so that proper operation of the pollution control equipment is maintained. Records of any inspections and/or maintenance shall be kept in log form and must be made available for review upon request during any inspection visit by Office of Pollution Control personnel.**
- 2. The permittee shall maintain on hand at all times sufficient equipment as is necessary to repair and/or overhaul the pollution control equipment. In the event of a failure of the pollution control equipment, the permittee shall cease operations until such time as repairs are made and the proper efficiency of the pollution control equipment is restored.**
- 3. For Emission Point AA-006, the permittee shall demonstrate compliance with PM emission limitations by stack testing in accordance with EPA Reference Methods 1-5, with PM₁₀ emission limitations by stack testing in accordance with EPA Reference Method 201 or 201A in conjunction with Reference Method 202, 40 CFR 51, Appendix M and with Opacity during the stack test in accordance with EPA Reference Method 9 and submittal of a stack test report within 180 days of startup, but not later than 60 days of attaining maximum production rate and biennially thereafter.**

A written test protocol must be submitted at least thirty (30) days prior to the intended test date(s) to ensure that all test methods and procedures are acceptable to the Department. If needed, the permittee may request a pretest conference to discuss the test methods and procedures. The pretest conference should be scheduled at least thirty (30) days prior to the test date. Also, the Department must be notified prior to the scheduled test date. At least TEN (10) DAYS notice should be given so that an observer may be scheduled to witness the test(s).

Part II. (Continued)

EMISSION LIMITATIONS AND MONITORING REQUIREMENTS

Beginning August 16, 2000, the permittee is authorized to construct modifications to air emissions equipment and emit air contaminants from Emission Point AA-007, the 17 Section Plywood Veneer Dryer No. 1 cooling zone (There are 3 stacks associated with this emission point) (Hood Ref. No. AA-004). The modification includes:

Extending the three stack heights from 44 feet to 65 feet.

The air emissions equipment shall be constructed to comply with the emission limitations and monitoring requirements specified below.

EMISSIONS LIMITATIONS

Opacity 40% as determined by EPA Test Method 9, 40 CFR 60, Appendix A.

All test methods specified above shall be those versions, or their approved equivalents, which are in effect August 16, 2000.

OPERATING LIMITATIONS

For Emission Points AA-004 and AA-007, the permittee shall be limited to a total maximum production of 191 MM sf/yr (3/8" basis) through both veneer dryers.

RECORDKEEPING AND REPORTING REQUIREMENTS

For Emission Points AA-004 and AA-007, the permittee shall record the amount of veneer dried in sf (3/8" basis) on both a daily basis and a consecutive 365-day period total.

Part II. (Continued)
EMISSION LIMITATIONS AND MONITORING REQUIREMENTS

Beginning August 16, 2000, the permittee is authorized to construct modifications to air emissions equipment and emit air contaminants from Emission Point AA-017, Layup and Pressing: Veneers are sorted and stacked for glue application, glue is applied, and the stacks are pressed while steam heated (Hood Ref. No. AA-019). The modification includes:

Replacement of the plywood press roof vents with two exhaust gas stacks of 65 feet.

The air emissions equipment shall be constructed to comply with the emission limitations and monitoring requirements specified below.

EMISSIONS LIMITATIONS

Opacity 40% as determined by EPA Test Method 9, 40 CFR 60, Appendix A.

All test methods specified above shall be those versions, or their approved equivalents, which are in effect August 16, 2000.

OPERATING LIMITATIONS

For Emission Point AA-017, the permittee shall be limited to a total maximum production of 274 MM sf/year (3/8" basis) at the plywood presses.

RECORDKEEPING AND REPORTING REQUIREMENTS

For Emission Point AA-017, the permittee shall record the total amount of plywood produced in sf (3/8" basis) on both a daily basis and a consecutive 365-day period total.

Part II. (Continued)
EMISSION LIMITATIONS AND MONITORING REQUIREMENTS

Beginning June 9, 2017, the permittee is authorized to construct air emissions equipment for the emission of air contaminants from Emission Point AA-025, the 23-Section Plywood Veneer Dryer No. 3, three heated drying zones equipped with a Regenerative Thermal Oxidizer No. 1 (Hood Ref. RTO1) for air emission controls. (See Emission Point AA-026 for the three cooling zones of the dryer.)

The air emissions equipment shall be constructed to comply with the emission limitations and monitoring requirements specified below.

EMISSIONS LIMITATIONS

Volatile Organic Compounds	Reduce VOCs by 90% or greater, as determined by EPA Test Method 25A, 40 CFR 60, Appendix A.
Opacity	40% as determined by EPA Test Method 9, 40 CFR 60, Appendix A.

All test methods specified above shall be those versions, or their approved equivalents, which are in effect June 9, 2017.

OPERATIONAL LIMITATIONS

The permittee shall not operate Emission Point AA-025 without the use of the Regenerative Thermal Oxidizer. In the event of a failure of the pollution control equipment, the permittee shall cease operations of Emission Point AA-025 until such time as repairs are made and the proper efficiency of the pollution control equipment is restored. Such air emissions equipment shall be operated as efficiently as possible to provide the maximum reduction of air contaminants.

OPERATIONAL LIMITATIONS

For Emission Point AA-025, the permittee is affected by and shall comply with applicable provisions and any subsequent modifications to the National Emission Standards for Hazardous Air Pollutants: Plywood and Composite Wood Products, 40 CFR Part 63 Subpart DDDD.

Part II. (Continued)

**REGENERATIVE THERMAL OXIDIZER CONTROL EQUIPMENT
REQUIREMENTS (AA-025)**

1. Inspections shall be performed each month, or more often as needed, and maintenance shall be performed as dictated by inspection results so that proper operation of the pollution control equipment is maintained. Records of any inspections and/or maintenance shall be kept in log form and must be made available for review upon request during any inspection visit by MDEQ personnel.
2. The permittee shall maintain on hand at all times sufficient equipment as is necessary to repair and/or overhaul the pollution control equipment. In the event of failure of the pollution control equipment, the permittee shall cease operations until such time as repairs are made and the proper efficiency of the pollution control equipment is restored.
3. The permittee shall demonstrate compliance with VOC and Opacity emission limitations by stack testing in accordance with EPA Reference Method 25 and Method 9 and submittal of a stack test report within 180 days of startup, but not later than 60 days of attaining maximum production rates.

A pretest conference at least thirty (30) days prior to the scheduled test date(s) is needed to ensure that all test methods and procedures are acceptable to the Office of Pollution Control. Also, the Office of Pollution Control must be notified prior to the scheduled test date. At least TEN (10) DAYS notice should be given so that an observer may be scheduled to witness the test(s).

4. The permittee shall maintain a three-hour block average firebox temperature above the minimum temperature established during the stack test which demonstrates compliance with the VOC reduction limitation established in this permit.
5. For Emission Point AA-025, the permittee is affected by and shall comply with applicable provisions and any subsequent modifications to the National Emission Standards for Hazardous Air Pollutants: Plywood and Composite Wood Products, 40 CFR 63 Subpart DDDD.

Part II. (Continued)
EMISSION LIMITATIONS AND MONITORING REQUIREMENTS

Beginning June 9, 2017, the permittee is authorized to construct emissions equipment for the emission of air contaminants from Emission Point AA-026, the 23-Section, steam heated, Coe Veneer Dryer, with the exhaust gases from the three cooling zones. See Emission Point AA-025 for the three drying zones of the dryer.

The air emissions equipment shall be constructed to comply with the emission limitations and monitoring requirements specified below.

EMISSIONS LIMITATIONS

Opacity	40% as determined by EPA Test Method 9, 40 CFR 60, Appendix A.
----------------	---

All test methods specified above shall be those versions, or their approved equivalents, which are in effect June 9, 2017.

Part III.
OTHER REQUIREMENTS

- 1. All records shall be kept in log form and must be made available for review upon request during any inspection visit by Office of Pollution Control personnel. All records shall be maintained by the permittee for a period of five years following the date of such record. The permittee shall submit a semi-annual report detailing the hours of operation of Emission Points AA-005 and AA-006, the combined production rates for Emission Points AA-004 and AA-007, and the total facility production rate for Emission Point AA-017 on a daily basis and a consecutive 365-day period total within 30 days of the end of each semi-annual period.**
