The Department of Environmental Quality understands the need for a Section 401 Water Quality Certification - Modification to the above referenced project. This action authorizes the reconciliation between the impacted and avoided wetland locations identified in the as-built survey received from Robert Anderson of Wetland Consulting Services, Inc. on March 6, 2018 and the impacted and avoided wetland locations which were previously identified in the Water Quality Certification issued on March 2, 2017.

The as-built survey identified four areas totaling 0.19 acre that were impacted but were not included in the original authorization. These areas are identified as impact numbers 7, 14, 23, and B in the modification request. Further the as-built survey identified two areas where impacts were reduced. Those areas are identified as impact numbers 2 and 20 and also total 0.19 acre in size.

Please be advised that all conditions of the Section 401 Water Quality Certification are unchanged. If we can be of further assistance, please contact Carrie Barefoot of my staff at (601) 961-5171.

Sincerely,
