Public Notice Only:			☐ Proof of publication received and attached ☐ Newspaper notice NOT required					

## Basis:

This water pretreatment permit is being modified due to the addition of an outfall named "Outfall 002" that corresponds to process wastewater discharge from a new 5-stage washer line. Additionally, the wastewater is now discharged to the West Rankin Utility Authority Wastewater Treatment Facility rather than the Jackson POTW, Savanna Street facility. The process wastewater discharge is regulated by 40 CFR Part 433 – Metal Finishing Point Source Category.

**Comments**: Since this is a pretreatment permit, 303(d) issues for the receiving stream are not applicable. The "receiving stream" is the West Rankin Utility Authority Wastewater Treatment Facility.

No comments were received during the 30-day public notice period.

# **Administrative Tasks**
