

State of Mississippi

FEDERALLY ENFORCEABLE AIR POLLUTION CONTROL PERMIT

Permit to Operate Air Emissions Equipment at a Synthetic Minor Source

THIS CERTIFIES

Motiva Enterprises LLC, Collins Terminal
21 Kola Road
Collins, MS
Covington County

has been granted permission to operate air emissions equipment in accordance with emission limitations, monitoring requirements and conditions set forth herein. This permit is issued in accordance with the Federal Clean Air Act and the provisions of the Mississippi Air and Water Pollution Control Law (Section 49-17-1 et. seq., Mississippi Code of 1972), the regulations and standards adopted and promulgated thereunder, and the State Implementation Plan for operating permits for synthetic minor sources.

Mississippi Environmental Quality Permit Board

Mississippi Department of Environmental Quality

Issued/Modified: JUN 01 2017

Expires: NOV 30 2013

Permit No. 0640-00001

Agency Interest # 1358

AI0000001358 (1358) Bulk Fuel Storage Terminal:

Limitation Requirements:

Condition No.	Parameter	Condition
L-1		The permittee shall limit facility-wide aggregate throughput (gasoline, gasoline additives, distillate, distillate additives and ethanol) to no more than 264,105,600 gallons in any consecutive 12-month period. [APC-S-2 II.B(10)]
L-2		The operator of the equipment covered by this permit shall operate and maintain this equipment to assure that the emission rates will not, at any time, exceed the rates allowed by the Mississippi Air Emission Regulations. [APC-S-2 II.B(10)]

Record-Keeping Requirements:

Condition No.	Condition
R-1	The permittee shall maintain monthly records of the facility-wide aggregate throughput (gasoline, gasoline additives, distillate, distillate additives and ethanol). The permittee shall maintain these records on file at the facility for five (5) years and shall make them available upon request by Office of Pollution Control personnel. [APC-S-2 II.B(11)]

Submittal/Action Requirements:

Condition No.	Condition
S-1	General Condition: Except as otherwise specified herein, the permittee shall report all deviations from permit requirements, including those attributable to upsets, the probable cause of such deviations, and any corrective actions or preventive measures taken. Said report shall be made within five (5) working days of the time the deviation began. [APC-S-2 II.B(10)]
S-2	Except as otherwise specified herein, the permittee shall Submit a certified semi-annual synthetic minor monitoring report: Due semiannually, by the 31st of January and July for preceding six months. This report shall address any required monitoring specified in the permit. [APC-S-2 II.B(11)]

Page 2 of 26

AI0000001358 (continued):

Submittal/Action Requirements:

Condition No.	Condition
S-3	The permittee shall submit a semi-annual report to the Office of Pollution Control indicating the facility-wide aggregate throughput (gasoline, gasoline additives, distillate, distillate additives, and ethanol) for each month and each consecutive 12 month period. [APC-S-2 II.B(11)]

Narrative Requirements:

Condition No.	Condition
T-1	General Condition: Any activities not identified in the application are not authorized by this permit. [Miss. Code Ann. 49-17-29 1.b]
T-2	General Condition: The permittee shall at all times maintain in good working order and operate as efficiently as possible all air pollution control facilities or systems installed or used by the permittee to achieve compliance with the terms and conditions of this permit. [APC-S-2 V.A]
T-3	General Condition: Solids removed in the course of control of air emissions shall be disposed of in a manner such as to prevent the solids from becoming windborne and to prevent the materials from entering state waters without the proper environmental permits. [Miss. Code Ann. 49-17-29 1.a(i and ii)]
T-4	General Condition: Any diversion from or bypass of collection and control facilities is prohibited except as provided for in Regulation APC-S-1, "Air Emission Regulations for the Prevention, Abatement, and Control of Air Contaminants", Section 10. [APC-S-1 Section 10]
T-5	General Condition: Should the Executive Director of the Mississippi Department of Environmental Quality declare an Air Pollution Emergency Episode, the permittee will be required to operate in accordance with the permittee's previously approved Emissions Reduction Schedule. [APC-S-2 X]
T-6	General Condition: The permittee shall allow the Mississippi Department of Environmental Quality Office of Pollution Control and the Mississippi Environmental Quality Permit Board and/or their authorized representatives, upon the presentation of credentials: (a) To enter upon the permittee's premises where an air emission source is located or in which any records are required to be kept under the terms and conditions of this permit, and (b) At reasonable times to have access to and copy any records required to be kept under the terms and conditions of this permit; to inspect any monitoring equipment or monitoring method required in this permit; and to sample any air emission. [Miss. Code Ann. 49-17-21]

AI0000001358 (continued):

Narrative Requirements:

Condition No.	Condition
T-7	General Condition: After notice and opportunity for a hearing, this permit may be modified, suspended, or revoked in whole or in part during its term for cause including, but not limited to: (a) Violation of any terms or conditions of this permit (b) Obtaining this permit by misrepresentation or failure to disclose fully all relevant facts; or (c) A change in any condition that required either a temporary or permanent reduction or elimination of authorized air emissions. [APC-S-2 II.C]
T-8	General Condition: This permit and/or any part thereof may be modified, revoked, reopened, and reissued, or terminated for cause. Sufficient cause for this permit to be reopened shall exist when an air emissions stationary source becomes subject to Title V. The filing of a request by the permittee for a permit modification, revocation and reissuance, or termination, or of a notification of planned changes or anticipated noncompliance does not stay any condition of the permit. [APC-S-2 II.B(15)b]
T-9	General Condition: Except for data determined to be confidential under the Mississippi Air & Water Pollution Control Law, all reports prepared in accordance with the terms of this permit shall be available for public inspection at the offices of the Mississippi Department of Environmental Quality Office of Pollution Control. [Miss. Code Ann. 49-17-39]
T-10	General Condition: The issuance of this permit does not convey any property rights in either real or personal property, or any exclusive privileges, nor does it authorize any injury to private property or any invasion of personal rights, nor any infringement of Federal, State, or local laws or regulations. [APC-S-2 II.B(15)c]
T-11	General Condition: Nothing herein contained shall be construed as releasing the permittee from any liability for damage to persons or property by reason of the installation, maintenance, or operation of the air cleaning facility, or from compliance with the applicable statutes of the State, or with local laws, regulations, or ordinances. [APC-S-2 II.B(7)]
T-12	General Condition: This permit may only be transferred upon approval of the Mississippi Environmental Quality Permit Board. [APC-S-2 XVI.B]
T-13	General Condition: This permit is for air pollution control purposes only. [APC-S-2 I.D(1)]
T-14	General Condition: This permit is a Federally-approved permit to operate a synthetic minor source as described in Regulation APC-S-2, Section IV.D. [APC-S-2 IV.D]

Permit to Operate Air Emissions Equipment at a Synthetic Minor Source

Motiva Enterprises LLC, Collins Terminal

Facility Requirements

Permit Number:0640-00001

Activity ID No.: PER20110001

Page 4 of 26

AI0000001358 (continued):

Narrative Requirements:

Condition No.	Condition
T-15	General Condition: The provisions of this permit are severable. If any provision of this permit, or the application of any provision of this permit to any circumstances, is challenged or held invalid, the validity of the remaining permit provisions and/or portions thereof or their application to other persons or sets of circumstances, shall not be affected thereby. [APC-S-2 I.D(7)]
T-16	General Condition: The permittee shall furnish to MDEQ within a reasonable time any information MDEQ may request in writing to determine whether cause exists for modifying, revoking and reissuing, or terminating the permit or to determine compliance with the permit. Upon request, the permittee shall also furnish to MDEQ copies of records required to be kept by the permit or, for information claimed to be confidential, the permittee shall furnish such records to MDEQ along with a claim of confidentiality. [APC-S-2 II.B(15)d]
T-17	General Condition: This permit does not authorize a modification as defined in APC-S-2, "Permit Regulations for the Construction and/or Operation of Air Emissions Equipment". Modification is defined as "Any physical change in or change in the method of operation of a facility which increases actual emissions or potential uncontrolled emissions of any air pollutant subject to regulation under the Federal Act emitted into the atmosphere by that facility or which results in the emission of any air pollutant subject to regulation under the Federal Act into the atmosphere not previously emitted. A physical change or change in the method of operation shall not include: (a) routine maintenance, repair, and replacement; (b) use of an alternative fuel or raw material by reason of an order under Sections 2(a) and (b) of the Federal Energy Supply and Environmental Coordination Act of 1974 (or any superseding legislation) or by reason of a natural gas curtailment plan pursuant to the Federal Power Act; (c) use of an alternative fuel by reason of an order or rule under Section 125 of the Federal Act; (d) use of an alternative fuel or raw material by a stationary source which: (i) the source was capable of accommodating before January 6, 1975, unless such change would be prohibited under any federally enforceable permit condition which was established after January 6, 1975, pursuant to 40 CFR 52.21 or under regulations approved pursuant to 40 CFR 51.166; or (ii) the source is approved to use under any permit issued under 40 CFR 52.51 or under regulations approved pursuant to 40 CFR 51.166; (e) an increase in the hours of operation or in the production rate unless such change would be prohibited under any federally enforceable permit condition which was established after January 6, 1975, pursuant to 40 CFR 52.51, or under regulations approved pursuant to Subpart I or 40 CFR 51.166; or (f) any change in ownership of the stationary source" [APC-S-2 I.D(2)]
T-18	General Condition: It shall not be a defense for a permittee in an enforcement action that it would have been necessary to halt or reduce the permitted activity in order to maintain compliance with the conditions of this permit unless halting or reducing activity would create an imminent and substantial endangerment threatening the public health and safety of the lives and property of the people of this state. [APC-S-2 II.B(15)a]

Permit to Operate Air Emissions Equipment at a Synthetic Minor Source

Motiva Enterprises LLC, Collins Terminal

Facility Requirements

Permit Number:0640-00001

Activity ID No.: PER20110001

Page 5 of 26

AI0000001358 (continued):

Narrative Requirements:

Condition No.	Condition
T-19	General Condition: The permittee shall retain all required records, monitoring data, supported information and reports for a period of at least five (5) years from the date of the monitoring sample, measurement, report, or application. Support information includes all calibration and maintenance records, all original strip-chart recordings or other data for continuous monitoring instrumentation, and copies of all reports required by this permit. Copies of such records shall be submitted to MDEQ as required by Applicable Rules and Regulations or this permit upon request. [APC-S-2 IX]
T-20	General Condition: The knowing submittal of a permit application with false information may serve as the basis for the Permit Board to void the permit issued pursuant thereto or subject the applicant to penalties for constructing or operating without a valid permit. [APC-S-2 II.B(5)]
T-21	General Condition: Emergencies (a) Except as otherwise specified herein, an emergency means any situation arising from sudden and reasonably unforeseeable events beyond the control of the source, including acts of God, which situation requires immediate corrective action to restore normal operation, and that causes the source to exceed a technology-based emission limitation under the permit, due to unavoidable increases in emissions attributable to the emergency. An emergency shall not include noncompliance to the extent caused by improperly designed equipment, lack of preventative maintenance, careless or improper operation, or operator error. (b) An emergency constitutes an affirmative defense to an action brought for noncompliance with such technology-based emission limitations if the conditions specified in (c) following are met. (c) The affirmative defense of emergency shall be demonstrated through properly signed contemporaneous operating logs, or other relevant evidence as follows: (i) an emergency occurred and that the permittee can identify the cause(s) of the emergency; (ii) the permitted facility was at the time being properly operated; (iii) during the period of the emergency the permittee took all reasonable steps to minimize levels of emissions that exceeded the emission standards, or other requirements in the permit; and (iv) the permittee submitted notice of the emergency to MDEQ within two (2) working days of the time when emission limitations were exceeded due to the emergency which contained a description of the emergency, any steps taken to mitigate emissions, and corrective actions taken. (d) In any enforcement proceeding, the permittee seeking to establish the occurrence of any emergency has the burden of proof. (e) This provision is in addition to any emergency or upset provision contained in any applicable requirement specified elsewhere herein [APC-S-2 II.B(10)]

Facility Requirements

Permit Number:0640-00001

Activity ID No.: PER20110001

Page 6 of 26

AI0000001358 (continued):

Narrative Requirements:

Condition No.	Condition
T-22	<p>General Condition: Upsets</p> <p>(a) The occurrence of an upset constitutes an affirmative defense to an enforcement action brought for noncompliance with emission standards or other requirements of Applicable Rules and Regulations or any applicable permit if the permittee demonstrates through properly signed contemporaneous operating logs, or other relevant evidence that include information as follows: (i) an upset occurred and that the permittee can identify the cause(s) of the upset; (ii) the source was at the time being properly operated; (iii) during the upset the permittee took all reasonable steps to minimize levels of emissions that exceeded the emission standards, or other requirements of Applicable Rules and Regulations or any applicable permit; (iv) the permittee submitted notice of the upset to the DEQ within five (5) working days of the time the upset began which contained a description of the upset, any steps taken to mitigate emissions, and corrective actions taken.</p> <p>(b) In any enforcement proceeding, the permittee seeking to establish the occurrence of an upset has the burden of proof.</p> <p>(c) This provision is in addition to any upset provision contained in any applicable requirement. [APC-S-1 Section 10]</p>
T-23	<p>General Condition: Startups and Shutdowns</p> <p>(a) Startups and shutdowns are part of normal source operation. Emissions limitations applicable to normal operation apply during startups and shutdowns except as follows: (i) when sudden, unavoidable breakdowns occur during a startup or shutdown, the event may be classified as an upset subject to the requirements above; (ii) when a startup or shutdown is infrequent, the duration of excess emissions is brief in each event, and the design of the source is such that the period of excess emissions cannot be avoided without causing damage to equipment or persons; or (iii) when the emissions standards applicable during a startup or shutdown are defined by other requirements of Applicable Rules and Regulations or any applicable permit.</p> <p>(b) In any enforcement proceeding, the permittee seeking to establish the applicability of any exception during a startup or shutdown has the burden of proof.</p> <p>(c) In the event this startup and shutdown provision conflicts with another applicable requirement, the more stringent requirement shall apply. [APC-S-1 Section 10]</p>

Narrative Requirements:

Condition No.	Condition
T-24	<p>General Condition: Maintenance</p> <p>(a) Maintenance should be performed during planned shutdown or repair of process equipment such that excess emissions are avoided. Unavoidable maintenance that results in brief periods of excess emissions and that is necessary to prevent or minimize emergency conditions or equipment malfunctions constitutes an affirmative defense to an enforcement action brought for noncompliance with emission standards, or other regulatory requirements if the permittee can demonstrate the following: (i) the permittee can identify the need for the maintenance; (ii) the source was at the time being properly operated; (iii) during the maintenance the permittee took all reasonable steps to minimize levels of emissions that exceeded the emission standards, or other requirements of Applicable Rules and Regulations or any applicable permit; (iv) the permittee submitted notice of the maintenance to MDEQ within five (5) working days of the time the maintenance began or such other times as allowed by MDEQ, which contained a description of the maintenance, any steps taken to mitigate emissions, and corrective actions taken.</p> <p>(b) In any enforcement proceeding, the permittee seeking to establish the applicability of this section has the burden of proof.</p> <p>(c) In the event this maintenance provision conflicts with another applicable requirement, the more stringent requirement shall apply. [APC-S-1 Section 10]</p>
T-25	<p>General Condition: For renewal of this permit the applicant shall make application not less than one-hundred eighty (180) days prior to the expiration date of the permit substantiated with current emissions data, test results or reports or other data as deemed necessary by the Mississippi Environmental Quality Permit Board. [APC-S-2 VIII]</p>

AREA0000000001 (FUG-001) Leaks from Equipment in Gasoline Service:

Record-Keeping Requirements:

Condition No.	Condition
R-1	<p>Beginning January 10, 2011, the permittee shall perform a monthly leak inspection of all equipment in gasoline service, as defined in 40 CFR 63.11100. For this inspection, detection methods incorporating sight, sound, and smell are acceptable.</p> <p>A log book shall be used and shall be signed by the permittee at the completion of each inspection. A section of the log book shall contain a list, summary description, or diagram(s) showing the location of all equipment in gasoline service at the facility.</p> <p>Each detection of a liquid or vapor leak shall be recorded in the log book. When a leak is detected, an initial attempt at repair shall be made as soon as practicable, but no later than 5 calendar days after the leak is detected. Repair or replacement of leaking equipment shall be completed within 15 calendar days after detection of each leak.</p> <p>Delay of repair of leaking equipment will be allowed if the repair is not feasible within 15 days. The permittee shall provide in the semiannual report specified in 40 CFR 63.11095(b), the reason(s) why the repair was not feasible and the date each repair was completed. [40 CFR 63.11089(a)-(d)]</p>
R-2	<p>Beginning January 10, 2011, the permittee shall prepare and maintain a record describing the types, identification numbers, and locations of all equipment in gasoline service. If the permittee elects to implement an instrument program under 40 CFR 63.11089, the record shall contain a full description of the program. [40 CFR 63.11094(d), 40 CFR 63.11089(g)]</p>
R-3	<p>Beginning January 10, 2011, the permittee shall record in the log book for each leak that is detected the information specified in the list below:</p> <ol style="list-style-type: none">(1) The equipment type and identification number.(2) The nature of the leak (i.e., vapor or liquid) and the method of detection (i.e., sight, sound, or smell).(3) The date the leak was detected and the date of each attempt to repair the leak.(d) Repair methods applied in each attempt to repair the leak.(e) "Repair delayed" and the reason for the delay if the leak is not repaired within 15 calendar days after discovery of the leak.(f) The expected date of successful repair of the leak if the leak is not repaired within 15 days.(g) The date of successful repair of the leak. [40 CFR 63.11089(g), 40 CFR 63.11094(e)]

EQPT0000000008 (AA-008) Truck Loading Rack Equipped with a Vapor Recovery Unit:

Limitation Requirements:

Condition No.	Parameter	Condition
L-1	Opacity	The permittee shall have emissions of Opacity \leq 40 % as determined by EPA Reference Method 9, 40 CFR 60, Appendix A. [APC-S-1 3.2]
L-2	Total Organic Compounds (TOC)	The permittee shall have emissions of Total Organic Compounds (TOC) \leq 15 mg/L of gasoline loaded (except as provided by Condition L-3 of this section), as determined by EPA Reference Methods 25A or 25B, 40 CFR 60, Appendix A and the test methods and procedures specified in 40 CFR 60.503. [APC-S-2 II.B(10)]
L-3		<p>Upon Permit Issuance until January 10, 2011, the permittee must comply with the following operational restrictions:</p> <ol style="list-style-type: none">(1) The permittee may load up to, but no more than, 7,500,000 gallons of additized gasoline in any consecutive 12-month period without the VRU on-line or operational. (Operation of the VRU is not necessary during loading of distillate.)(2) Except as provided by Paragraph (1), the permittee shall act to assure that loadings of gasoline tank trucks at the affected facility are made only into tanks equipped with vapor collection equipment that is compatible with the terminal's vapor collection system.(3) Except as provided by Paragraph (1), the permittee shall act to assure that the terminal's and the tank truck's vapor collection systems are connected during each loading of a gasoline tank truck at the affected facility. Examples of actions to accomplish this include training drivers in the hookup procedures and posting visible reminder signs at the affected loading racks. [APC-S-2 II.B(10)]
L-4		<p>Beginning January 10, 2011, the permittee must comply with the following emission operational limitations:</p> <ol style="list-style-type: none">(1) The permittee must equip each loading rack with a vapor collection system designed to collect the TOC vapors displaced from cargo tanks during product loading and reduce emissions of TOC to less than or equal to 15 mg/l of gasoline loaded into gasoline cargo tanks at the loading rack. The vapor collection system must be designed and operated to prevent any TOC vapors collected at one loading rack from passing to another loading rack.(2) The permittee shall limit the loading of gasoline into gasoline cargo tanks that are vapor tight using the procedures specified in 40 CFR 60.502 (e) through (j). [APC-S-2 II.B(10), 40 CFR 63.11088(a), 40 CFR 63. Subpart BBBBBB (Table 2)(1(a)-(d))]

Limitation Requirements:

Condition No.	Parameter	Condition
L-5		Beginning January 10, 2011, as an alternative for railcar cargo tanks to the requirements specified in Table 2 to 40 CFR Subpart BBBBBB, the permittee may comply with the requirements specified in 40 CFR 63.422(e). [40 CFR 63.11088(b)]

Monitoring Requirements:

Condition No.	Parameter	Condition
M-1		<p>Performance Testing Requirements</p> <p>(1) For Emission Point AA-008, the permittee shall demonstrate compliance with the additized gasoline (each grade of gasoline as received from the pipeline plus additive) loading emission limitation by using the test methods and procedures of 40 CFR 60.503. The compliance test shall be performed after the issuance date of this permit, but no later than (90) days prior to its expiration date. Each test report shall be submitted within forty-five (45) days of the test date.</p> <p>(2) For Emission Point AA-008, the permittee shall submit a written test protocol at least thirty (30) days prior to the intended test date(s) to ensure that all test methods and procedures are acceptable to the DEQ. Also, the permittee shall notify the DEQ in writing at least ten (10) days notice so that an observer may be afforded the opportunity to witness the test. [APC-S-2 Ii.B(11)]</p>

Monitoring Requirements:

Condition No.	Parameter	Condition
M-2		<p>Beginning January 10, 2011, the permittee must comply with the following testing and monitoring requirements:</p> <ol style="list-style-type: none">(1) The permittee shall conduct a performance test on the vapor processing and collection systems by July 9, 2011, according to either paragraph (a) or (b) of this condition.<ol style="list-style-type: none">(a) Use the test methods and procedures in 40 CFR 60.503, except a reading of 500 parts per million shall be used to determine the level of leaks to be repaired under 40 CFR 60.503(b)(b) Use alternative test methods and procedures in accordance with the alternative test method requirements in 40 CFR 63.7(f).(2) If operating the gasoline loading rack in compliance with an enforceable State permit that requires the loading rack to meet an emission limit of 80 milligrams (mg), or less, per liter of gasoline loaded (mg/l), the permittee may submit a statement by a responsible official certifying the compliance status of the loading rack in lieu of the test required under paragraph (1).(3) If a performance test has been conducted on the vapor processing and collection systems within 5 years prior to January 10, 2008, and the test is representative of current or anticipated operating processes and conditions, the permittee may submit the results of such testing in lieu of the test required under paragraph (1), provided the testing was conducted using the test methods and procedures in 40 CFR 60.503. Should the Department deem the prior test data unacceptable, the facility is still required to meet the requirement to conduct an initial performance test within 180 days of the compliance date specified in 40 CFR 63.11083; thus, previous test reports should be submitted as soon as possible after January 10, 2008.(4) The permittee shall determine a monitored operating parameter value for the vapor processing system using the procedures specified in 40 CFR 63.11092(b)(1), and (b)(3) through (5) during each performance test conducted under Paragraph (1).(5) The permittee shall document the reasons for a change in the operating parameter value being monitored when there is a change from the value obtained from a previous performance test. [40 CFR 63.11088(d), 40 CFR 63.11092(a), 40 CFR 63.11092(b), 40 CFR 63.11092(c)]

Submittal/Action Requirements:

Condition No.	Condition
S-4	<p>Beginning January 10, 2011, for Emission Points AA-001, AA-002, AA-003, AA-008, AA-020 & FUG-001, the permittee shall submit an excess emissions report to the Department at the time the semiannual compliance report is submitted for a 6-month period during which an excess emission event has occurred. If no excess emission events have occurred during the previous 6-month period, no report is required. Excess emissions events and the information to be included in the excess emissions report, are specified in paragraphs (1) through (5) of this condition.</p> <p>(1) Each instance of a non-vapor-tight gasoline cargo tank loading at the facility in which the permittee failed to take steps to assure that such cargo tank would not be reloaded at the facility before vapor tightness documentation for that cargo tank was obtained.</p> <p>(2) Each reloading of a non-vapor-tight gasoline cargo tank at the facility before vapor tightness documentation for that cargo tank is obtained by the facility in accordance with 40 CFR 63.11094(b).</p> <p>(3) Each exceedance or failure to maintain, as appropriate, the monitored operating parameter value determined under 40 CFR 63.11092(b). The report shall include the monitoring data for the days on which exceedances or failures to maintain have occurred, and a description and timing of the steps taken to repair or perform maintenance on the vapor collection and processing systems or the CMS.</p> <p>(4) Each instance in which malfunctions discovered during the monitoring and inspections required under 40 CFR 63.11092(b)(1)(i)(B)(2) and (b)(1)(iii)(B)(2) were not resolved according to the necessary corrective actions described in the monitoring and inspection plan. The report shall include a description of the malfunction and the timing of the steps taken to correct the malfunction.</p> <p>(5) For each occurrence of an equipment leak for which no repair attempt was made within 5 days or for which repair was not completed within 15 days after detection:</p> <p>(a) The date on which the leak was detected;</p> <p>(b) The date of each attempt to repair the leak;</p> <p>(c) The reasons for the delay of repair;</p> <p>(d) The date of successful repair. [40 CFR 63.11087(e), 40 CFR 63.11088(f), 40 CFR 63.11089(g), 40 CFR 63.11095(b), 40 CFR 63.11095(c)]</p>
