CONSTRUCTION MINIMUM MEASURE ASSISTANCE PETITION SMALL MUNICIPAL SEPARATE STORM SEWER SYSTEM (MS4) GENERAL PERMIT

GENERAL PERMIT: MSRMS4 0 0 8. This coverage number must be completed for the referenced MS4 or this form will be considered incomplete and will be returned. The coverage number can be found at the bottom left corner of your previous Certificate of Coverage.

INSTRUCTIONS

The form must be submitted to petition MDEQ to assume responsibility for the regulation of storm water runoff from construction activities five (5) acres and greater.

The MS4 General Permit requires regulated entities (MS4s) to develop and implement a Storm Water Management Program (SWMP) to reduce the discharge of pollutants from their storm water conveyance systems. The SWMP must include six (6) minimum control measures, including Construction Site Storm Water Runoff Control from construction activities that result in a land disturbance of greater than or equal to one (1) acre or less if part of a larger common plan of development or sale. ACT6, SHARING MINIMUM MEASURE RESPONSIBILITY of the General Permit allows the regulated entity to petition MDEQ to assume responsibility for the regulation of storm water runoff from large construction activities five (5) acres and greater.

Activities that disturb less than five (5) acres remain the MS4's responsibility, including activities that are part of a larger common plan of development or sale. For example, the MS4 is responsible for regulating storm water runoff from individual lot construction even though the large residential subdivision had been covered under MDEQ's Large Construction Storm Water General Permit.

If MDEQ agrees to assume this responsibility, the regulated entity is not required to include MDEQ's portion of the minimum control measure in the SWMP, nor required to address large construction in the annual report. If MDEQ does not agree to assume this responsibility, the regulated entity will be notified in writing.

In accordance with ACT6, SHARING MINIMUM MEASURE RESPONSIBILITY of the General Permit, the regulated entity (MS4) described above, requests the Mississippi Department of Environmental Quality (MDEQ) to assume responsibility for regulating storm water runoff from large construction activities, five (5) acres and greater. I understand that the above MS4 is still required to develop and implement a Storm Water Management Plan to reduce pollutants from construction activities less than five (5) acres in accordance with ACT5 of the general permit.
