

INDUSTRIAL STORMWATER GENERAL PERMIT RE-COVERAGE FORM

FOR COVERAGE UNDER MISSISSIPPI'S REISSUED
INDUSTRIAL STORMWATER GENERAL PERMIT MSR00
GENERAL NPDES COVERAGE NO. MSR00 0294 _ _

INSTRUCTIONS

The submittal of this form is required to receive coverage under the reissued Industrial Stormwater General Permit. This form must be completed and returned to the address printed at the bottom of page 2.

The signatory of this form must be the owner or operator who is the current coverage recipient (rather than the plant/site manager or environmental consultant). The coverage recipient is responsible for permit compliance.

Amendments to the Storm Water Pollution Prevention Plan (SWPPP) are required to be attached if the plan is not current or is ineffective in controlling storm water pollutants.

If the facility is out of business or no longer a regulated facility, please request termination of coverage by completing the Request for Termination (RFT) Form found in the Industrial Stormwater Forms Package. Facilities that continue to discharge wastewater without applicable permit coverage are in violation of state law.

Do not submit this form if submitting a "Request for Termination" (RFT).

Do not submit this form if submitting a "No Exposure Certification."

ALL INFORMATION MUST BE COMPLETED (Enter "NA" if not applicable).

COVERAGE RECIPIENT INFORMATION

CONTACT NAME & POSITION: Shane Swygart, Environmental Manager

EMAIL ADDRESS: shane.swygart@omnisource.com

COMPANY NAME: OmniSource, LLC

STREET OR P.O. BOX: 7575 W. Jefferson Blvd.

CITY: Fort Wayne STATE: IN ZIP: 46804

PHONE NUMBER (INCLUDE AREA CODE): Direct: 260-423-8522 / Cell: 260-849-9046

FACILITY INFORMATION

FACILITY NAME: OmniSource, LLC - Sherman

CONTACT NAME & POSITION: John Swain, Yard Super

CONTACT PHONE NUMBER (INCLUDE AREA CODE): (662) 680-8110

PRIMARY STANDARD INDUSTRIAL CLASSIFICATION (SIC) CODE & DESCRIPTION OF INDUSTRIAL ACTIVITY:
5 0 9 3 Scrap and Waste Materials

PHYSICAL SITE ADDRESSSTREET: 2245 State Road 178 EastCITY: ShermanCOUNTY: UnionZIP: 38869**PROVIDE THE COORDINATES OF THE PLANT ENTRANCE:**LATITUDE: 34 degrees 22 minutes 08 secondsLONGITUDE: 88 degrees 51 minutes 01 secondsNEAREST NAMED RECEIVING STREAM FOR STORM WATER LEAVING THE SITE: Unnamed tributary of Wolf Creek

IS RECEIVING STREAM ON MDEQ's 303(d) LIST?

☐ YES☒ NOIF YES, HAS A TMDL BEEN ESTABLISHED FOR THE RECEIVING STREAM SEGMENT? ☐ YES☒ NO**STORM WATER POLLUTION PREVENTION PLAN (SWPPP)**

IS A COPY OF THE SWPPP AT THE PERMITTED SITE?

☒ YES ☐ NO

IS THE SWPPP UP-TO-DATE AND EFFECTIVE IN CONTROLLING STORM WATER POLLUTANTS?

☒ YES ☐ NO

IF NO, PLEASE ATTACH REQUIRED SWPPP AMENDMENTS (see Instructions on front page).

AUTO SALVAGE FACILITIES ONLY

FOR AUTO SALVAGE FACILITIES, A REVISED SWPPP TO COMPLY WITH THE NEW PERMIT MUST BE SUBMITTED TO MDEQ NO LATER THAN JANUARY 31, 2022.

DOES THE SWPPP REQUIRE CHANGES TO COMPLY WITH THE NEW PERMIT?

☐ YES ☐ NO

IS A REVISED COPY OF THE SWPPP ATTACHED?

☐ YES ☐ NO

I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gathered and evaluated the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fines and imprisonment for knowing violations.

I further certify that I understand when coverage is terminated the facility is no longer authorized to discharge storm water associated with industrial activity under this general permit. I understand that discharging pollutants in storm water associated with industrial activity to waters of the state without NPDES coverage is in violation of state law.

SWPPP CERTIFICATION

This Storm Water Pollution Prevention Plan (SWPPP) was prepared for OmniSource LLC, in Sherman, Mississippi, in accordance with best management practices and in accordance with the factors outlined in Title 40 Code of Federal Regulations 122.26 and the Mississippi Baseline Storm Water General Permit for Industrial Activities, as appropriate. It has the full approval of management at a level of authority to commit the necessary resources to ensure full SWPPP implementation. This SWPPP will be implemented as described herein and will be reviewed and evaluated annually.

I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based upon my inquiry of the person or persons who manage the site, or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations.

Title

1.1 Regulatory Drivers

40 CFR122.26(b)(14): Storm water discharge associated with industrial activity. Means the discharge from any conveyance that is used for collecting and conveying storm water and that is directly related to manufacturing, processing, or raw materials storage areas at an industrial plant. The term does not include discharges from facilities or activities excluded from the NPDES program under this part. For the categories of industries identified in this section, the term includes, but is not limited to, storm water discharges from industrial plant yards; immediate access roads and rail lines used or traveled by carriers of raw materials, manufactured products, waste material, or by-products used or created by the facility; material handling sites; refuse sites; sites used for the application or disposal of process waste waters (as defined at part 401 of this chapter); sites used for the storage and maintenance of material handling equipment; sites used for residual treatment, storage, or disposal; shipping and receiving areas; manufacturing buildings; storage areas (including tank farms) for raw materials, and intermediate and final products; and areas where industrial activity has taken place in the past and significant materials remain and are exposed to storm water. For the purposes of this paragraph, material handling activities include storage, loading and unloading, transportation, or conveyance of any raw material, intermediate product, final product, by-product, or waste product. The term excludes areas located on plant lands separate from the plant's industrial activities, such as office buildings and accompanying parking lots, as long as the drainage from the excluded areas is not mixed with storm water drained from the above described areas. Industrial facilities (including industrial facilities that are federally-, state-, or municipally-owned or operated that meet the description of the facilities listed in paragraphs (b)(14)(i) through (xi) of this section) include those facilities designated under the provisions of paragraph (a)(1)(v) of this section. The following categories of facilities are considered to be engaging in "industrial activity" for purposes of paragraph (b)(14):

Category (vi) Facilities involved in the recycling of materials, including metal scrap yards, battery reclaimers, salvage yards, and automobile junkyards, including but limited to those classified as SIC 5015 (used motor vehicle parts) and 5093 (scrap and waste materials).

OmniSource discharges storm water associated with industrial activity as defined in the United States Environmental Protection Agency (U.S. EPA) NPDES program established pursuant to the Federal Water Pollution Control Act, as amended by the Clean Water Act (33 U.S.C. 1251 et seq.), and codified in 40 Code of Federal Regulations (CFR) 122. Mississippi is a delegated state with NPDES permitting authority. The state's NPDES program is administered by the Mississippi Department of Environmental Quality (MDEQ). Mississippi storm water regulations for storm water discharges associated with industrial activity are codified in the Mississippi Code of 1972, and set forth in the *Mississippi Water Pollution Control Law*, 49-47-1 et seq., as amended, and the Mississippi Commission on Environmental Quality Regulation WPC-1, *Wastewater Regulations for National Pollutant Discharge Elimination System (NPDES) Permits, Underground Injection Control (UIC) Permits, State Permits, Water Quality Based Effluent Limitations and Water Quality Certification*.

OmniSource is covered under Mississippi's Baseline Storm Water General Permit for Industrial Activities (MSR00). A SWPPP required for all facilities classified under Standard Industrial Classification (SIC) code 5093 (Scrap and Waste Materials) that discharge storm water from industrial activities and have obtained coverage under MSR00. The facility's coverage under MSR00 was re-issued on December 10, 2020 and will expire November 30, 2025. Copies of the General Permit (MSR00), and the Notice of Coverage (MSR000294) are included in Appendix A. Table 1-1 summarizes permit requirements.

1.3 Pollution Prevention Team

U.S. EPA MSGP 2015 5.2.1: *Stormwater Pollution Prevention Team.* You must identify the staff members (by name or title) that comprise the facility's stormwater pollution prevention team as well as their individual responsibilities. Your stormwater pollution prevention team is responsible overseeing development of the SWPPP, any modifications to it, and for implementing and maintaining control measures and taking corrective actions where required. Each member of the stormwater pollution prevention team must have ready access to either an electronic or paper copy of applicable portions of the permit, the most updated copy of your SWPPP, and other relevant documents or information that must be kept with the SWPPP.

The NPDES Permit requires that each SWPPP identify a specific individual(s) within the organization as members of the Storm Water Pollution Prevention Team (SWPPT), organized to implement an effective storm water management program.

Effective organization is important for the SWPPT to accomplish the task of implementing and maintaining a comprehensive SWPPP. The SWPPT is responsible for developing and implementing the storm water management controls to minimize the discharge of pollutants to the environment. The SWPPT has overall responsibility for the program and for instituting revisions when necessary. The responsibility for storm water pollution prevention for the site lies with the OmniSource Yard Manager. The Yard Manager directs the efforts of the storm water team to ensure the actions required by the SWPPP are implemented. Table 1-2 lists the members of the storm water team and their responsibilities are presented in Table 1-3.

Table 1-2 shows the SWPPT members anticipated to implement and maintain adequate storm water management practices.

Table 1-2 Storm Water Team

1.2 Storm Water Pollution Prevention Plan Requirements

MSR00 ACT5 T-1: Storm Water Pollution Prevention Plan (SWPPP) Development. A SWPPP shall be developed and implemented for each facility subject to this permit. A SWPPP shall be prepared in accordance with sound engineering practices and shall identify potential sources of pollution, which may reasonably be expected to affect the quality of storm water discharges associated with industrial activity from the facility. The SWPPP shall describe and ensure the implementation of best management practices which will reduce pollutants in storm water discharges and assure compliance with the terms and conditions of this permit.

MSR00 ACT-5, located in Appendix A, specifically requires OmniSource to develop and implement a SWPPP. In general, this SWPPP follows the sequence of the regulatory requirements for SWPPPs outlined in, 40 CFR 122.26, U.S. EPA MSGP 2015, and MSR00. The SWPPP discusses the facility's conformance to the applicable regulatory requirements of that section. In general, the federal regulations are cited at the beginning of each appropriate section. If state regulations or individual permits are different than federal requirements, they are discussed in the applicable section.
