**MINING NOTICE OF INTENT (MNOI)
FOR COVERAGE UNDER
MINING STORM WATER, DEWATERING AND NO DISCHARGE
GENERAL PERMIT MSR32 2830
(Number to be assigned by State)**

File at least 30 days prior to the commencement of mining; 15 days if a Storm Water Pollution Prevention Plan (SWPPP) is already on file and mine dewatering is not proposed. Lateral expansion of an existing mine that has general permit coverage requires the submittal of the Major Modification Form, not a new MNOI. However, modification of the existing SWPPP to include the expansion is required. Discharge of storm water or impounded water associated with mining or the operation of a wastewater recirculation system with no discharge without written notification of coverage from MDEQ is a violation of State Law.

If the company seeking coverage is a corporation, a limited liability company, a partnership, or a business trust, attach proof of its registration with the Mississippi Secretary of State and/or its Certificate of Good Standing. This registration or Certificate of Good Standing must be dated within twelve (12) months of the date of the submittal of this coverage form. Coverage will be issued in the company name as it is registered with the Mississippi Secretary of State.

Please indicate the activities to be covered by this MNOI (check all that apply).

- Storm Water Discharges Associated with Mining
- Mine Dewatering
- Wastewater Recirculation System with No Discharge

The appropriate section of the MNOI must be completed if the applicant proposes to discharge storm water, discharge impounded mine water (dewatering) and/or operate a wastewater recirculation system with no discharge.

A site-specific Storm Water Pollution Prevention Plan (SWPPP) developed in accordance with ACT5 of the General Permit and a United States Geological Survey (USGS) quadrangle map or photocopy, indicating the site location and outfalls must be included with the MNOI submittal. The name of the quadrangle map must be shown on all copies. Quadrangle maps can be obtained from the MDEQ, Office of Geology at 601-961-5523. Additional submittals may include the following (check all that apply).

- Section 404 Documentation
- Notice of Exempt Operations Form
- Dam/Reservoir Safety Permit or Written Authorization

ALL INFORMATION MUST BE COMPLETED (indicate "N/A" where not applicable)

RECOMMENDATIONS FOR THE CONTROL OF
TUBERCULOSIS IN THE UNITED STATES
1995
Final Report of the National Tuberculosis
Consultation Group

The purpose of this report is to provide a summary of the recommendations of the National Tuberculosis Consultation Group (NTCG) for the control of tuberculosis in the United States. The NTCG was convened in 1994 to review the current status of tuberculosis in the United States and to make recommendations for the control of the disease. The NTCG's recommendations are based on a review of the current status of tuberculosis in the United States and on the results of a series of consultations with experts in the field of tuberculosis control. The NTCG's recommendations are intended to provide a framework for the development of a national tuberculosis control strategy.

- Tuberculosis is a leading cause of death and disability in the United States.
- Tuberculosis is a preventable disease.
- Tuberculosis is a curable disease.
- Tuberculosis is a contagious disease.
- Tuberculosis is a disease that can be controlled.
- Tuberculosis is a disease that can be eliminated.
- Tuberculosis is a disease that can be eradicated.
- Tuberculosis is a disease that can be prevented.
- Tuberculosis is a disease that can be treated.
- Tuberculosis is a disease that can be cured.
- Tuberculosis is a disease that can be controlled.
- Tuberculosis is a disease that can be eliminated.
- Tuberculosis is a disease that can be eradicated.
- Tuberculosis is a disease that can be prevented.
- Tuberculosis is a disease that can be treated.
- Tuberculosis is a disease that can be cured.

The NTCG's recommendations are based on a review of the current status of tuberculosis in the United States and on the results of a series of consultations with experts in the field of tuberculosis control. The NTCG's recommendations are intended to provide a framework for the development of a national tuberculosis control strategy. The NTCG's recommendations are based on a review of the current status of tuberculosis in the United States and on the results of a series of consultations with experts in the field of tuberculosis control.
