

# MAJOR MODIFICATION FORM FOR MINING STORM WATER ACTIVITIES

MINING STORM WATER GENERAL NPDES PERMIT MSR32

## INSTRUCTIONS

Coverage recipients shall notify the Mississippi Department of Environmental Quality of plans to expand the acreage or "footprint" of an existing mining activity that discharges storm water or that has previously certified no discharge. This form and a modified Storm Water Pollution Prevention Plan (SWPPP), including an updated USGS topographic map, must be submitted when:

- SWPPP details have been developed and are ready for MDEQ review for subsequent phases of an existing, covered mining activity.
- The "footprint" identified in the original Mining Notice of Intent is proposed to be enlarged.

This form must be signed by the original coverage recipient under Mississippi's Mining Storm Water General Permit. A different operator must have storm water coverage transferred prior to storm water coverage being modified. Coverage recipients are authorized to discharge storm water associated with proposed expansions of existing mining activities, under the conditions of the General Permit, only upon receipt of written notification of approval by the MDEQ. If mining modifications incorporate a hydraulic dredging operation, closed loop wash operation, or a discharge of process wastewater to State waters, additional permitting actions shall be required.
