RE: *Hydrostatic Test Notice of Intent (1)*
Texas Eastern Transmission, LP
6400 SE TETLP YAZO-KOSC/ 26D 0.00-3.07 Make Piggable Project
Atalla County, Mississippi

To Whom It May Concern:

On behalf of Texas Eastern Transmission, LP (TETLP¹), an indirect, wholly owned subsidiary of Enbridge, Inc., *Environment & Archaeology* has prepared the attached Hydrostatic Test Notice of Intent (NOI) form for the hydrostatic testing of launcher and receiver traps, isolation valves, piping modifications, and fitting replacements on two (2) segments of an existing natural gas pipeline, Line 26, in Attala County, Mississippi (Figure 1). The purpose of the proposed Project is to maintain the integrity of the existing pipeline system by facilitating the use of in-line inspection tools.

TETLP is planning to hydrostatically test approximately 534 feet of new pipeline, valves, and associated fittings utilizing municipal water as the source. The discharge locations will be located within upland areas of TETLP's pipeline right-of-way (ROW). Two (2) outfalls for a point source discharge will be utilized at the hydrostatic test discharge locations listed below. Approximately 3,197.4 gallons of water will be discharged onsite on or near May 12, 2025.

TETLP will adhere to discharge conditions outlined in the TETLP Erosion and Sedimentation Control Plan (ESCP). Applicable portions of the ESCP have been attached for review. A detailed description of the Project components associated with the proposed hydrostatic testing is located in Table 1.

We respectfully request that you review the attached Notice of Intent form and issue a notice of coverage under the general permit. If you have any questions regarding this Project, please contact Edward Beene of TETLP at (860) 462-5862 or ed.beene@enbridge.com, or myself at (330) 605-9196 or tsnelick@environment-archaeology.com.

Sincerely,

Taylor Snelick
Project Manager
