In the case of linear pipeline projects the map shall extend at least one-half of a mile beyond the pipeline right-of-way. The site location and outfalls must be outlined and labeled. Quad maps can be obtained from the Office of Geology (601-961-5523). If a copy is submitted, provide the name of the quadrangle map that is found in upper right hand corner.

Additional submittals may include the following:

This is only required if construction activity including clearing, grading, and excavation, results in the disturbance of five acres or more of land. Activity less than five acres is also included if part of a common plan of development or sale with a planned disturbance of 5 acres or more.
- A list of water treatment chemicals, if added to the fill water. The applicant must provide the following information for each specific chemical: Material Safety Data Sheet (MSDS), composition of the additive, expected discharge concentrations, dosage addition rates, frequency of use, EPA registration (if applicable), and aquatic species toxicological data. There shall be no chemical additives containing any priority pollutants listed in 40 CFR 122, Appendix D, Tables II and III.
- Appropriate documentation from the U.S. Army Corps of Engineers, if a Section 404 Permit is required. For information call the Vicksburg District at 601/631-5289 or 5276 or the Mobile District at 334/694-3776 (a part of northern Desoto County is in the Memphis District (901/544/0736)).
