LARGE CONSTRUCTION NOTICE OF INTENT (LCNOI) FOR COVERAGE UNDER THE LARGE CONSTRUCTION STORM WATER GENERAL NPDES PERMIT

INSTRUCTIONS

The Large Construction Notice of Intent (LCNOI) is for coverage under the Large Construction General Permit for land disturbing activities of five (5) acres or greater; or for land disturbing activities, which are part of a larger common plan of development or sale that are initially less than five (5) acres but will ultimately disturb five (5) or more acres. Applicant must be the owner or operator. For construction activities, the operator is typically the prime contractor. The owner(s) of the property and the prime contractor associated with regulated construction activity on the property have joint and severable responsibility for compliance with the Large Construction Storm Water General Permit MSR10.

If the company seeking coverage is a corporation, a limited liability company, a partnership, or a business trust, attach proof of its registration with the Mississippi Secretary of State and/or its Certificate of Good Standing. This registration or Certificate of Good Standing must be dated within twelve (12) months of the date of the submittal of this coverage form. Coverage will be issued in the company name as it is registered with the Mississippi Secretary of State.

Completed LCNOIs should be filed at least thirty (30) days prior to the commencement of construction. Discharge of storm water from large construction activities without written notification of coverage is a violation of state law.

Submittals with this LCNOI must include:

- A site-specific Storm Water Pollution Prevention Plan (SWPPP) developed in accordance with ACT5 of the General Permit
- A detailed site-specific scaled drawing showing the property layout and the features outlined in ACT5 of the General Permit
- A United States Geological Survey (USGS) quadrangle map or photocopy, extending at least one-half mile beyond the facility property boundaries with the site location and outfalls outlined or highlighted. The name of the quadrangle map must be shown on all copies. Quadrangle maps can be obtained from the MDEQ, Office of Geology at 601-961-5523.

Additional submittals may include the following, if applicable:

- Appropriate Section 404 documentation from U.S. Army Corps of Engineers
- Appropriate documentation concerning future disposal of sanitary sewage and sewage collection system construction
- Appropriate documentation from the MDEQ Office of Land & Water concerning dam construction and low flow requirements
- Approval from County Utility Authority in Hancock, Harrison, Jackson, Pearl River and Stone Counties

ALL QUESTIONS MUST BE ANSWERED (Answer "NA" if the question is not applicable)

IF THE PROJECT IS A SUBDIVISION OR A COMMERCIAL DEVELOPMENT, HOW WILL SANITARY SEWAGE BE DISPOSED? Check one of the following and attach the pertinent documents.

- Existing Municipal or Commercial System. Please attach plans and specifications for the collection system and the associated "Information Regarding Proposed Wastewater Projects" form or approval from County Utility Authority in Hancock, Harrison, Jackson, Pearl River and Stone Counties. If the plans and specifications can not be provided at the time of LCNOI submittal, MDEQ will accept written acknowledgement from official(s) responsible for wastewater collection and treatment that the flows generated from the proposed project can and will be transported and treated properly. The letter must include the estimated flow.
- Collection and Treatment System will be Constructed. Please attach a copy of the cover of the NPDES discharge permit from MDEQ or indicate the date the application was submitted to MDEQ (Date: _____.)
- Individual Onsite Wastewater Disposal Systems for Subdivisions Less than 35 Lots. Please attach a copy of the Letter of General Acceptance from the Mississippi State Department of Health or certification from a registered professional engineer that the platted lots should support individual onsite wastewater disposal systems.
- Individual Onsite Wastewater Disposal Systems for Subdivisions Greater than 35 Lots. A determination of the feasibility of installing a central sewage collection and treatment system must be made by MDEQ. A copy of the response from MDEQ concerning the feasibility study must be attached. If a central collection and wastewater system is not feasible, then please attach a copy of the Letter of General Acceptance from the State Department of Health or certification from a registered professional engineer that the platted lots should support individual onsite wastewater disposal systems.

INDICATE ANY LOCAL STORM WATER ORDINANCE WITH WHICH THE PROJECT MUST COMPLY:

STORM WATER POLLUTION PREVENTION PLAN (SWPPP)
FEDUCCIA PARK IMPROVEMENT PROJECT
CLEVELAND, MS

SITE INFORMATION

The project consists of the construction of a new soccer complex including site grading, installation of new storm drainage pipes, new storm drain inlets, a vegetative swale, and a detention pond. The construction will disturb 30.5 acres of land located along Yale Street, in Cleveland, Mississippi. The existing site can be described as flat ground. Proposed roadway longitudinal slopes will not exceed 2.0%, and no grading feature shall exceed a 3:1 slope.

CONTROLS

Vegetative Controls: A minimum 15 foot wide undisturbed vegetative buffer zone will be maintained around the perimeter of the site. All diversion will be seeded (Permanent seeding) within 7 calendar days of construction. Any disturbed areas that will be left undisturbed for fourteen or more days will be seeded (temporary seeding) within seven calendar days. After Final Grading, all disturbed areas will be seeded (permanent seeding) within seven calendar days.

Structural Controls: A limestone construction entrance will be constructed/maintained at the West end of the site and any accumulation of mud from vehicle tires will be washed. Temporary silt fence shall be constructed around all disturbed areas and shall be maintained as long as soils are exposed and unprotected by permanent erosion control measures. Straw wattles are to be installed as indicated on plans.

Housekeeping Practices: All equipment maintenance and repairs will be performed off site. There will be a designated area for concrete truck wash off.

Post Construction/Storm Water Management Measures: All open landscaped areas will be permanently maintained with vegetative cover. All pavement areas will be permanently maintained after construction. All vegetative areas will be maintained to provide proper ground cover and reseeded as needed.

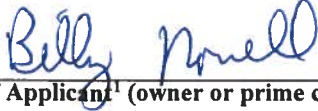

IMPLEMENTATION SEQUENCE

- 1) Build construction entrance/exit.
- 2) Temporary silt fences/vegetative buffer around the site shall be installed as soon as construction is initiated
- 3) Rough grade site, begin constructing access road bed, and construct necessary diversions, and install culverts with Inlet/Outlet protection where applicable.
- 4) Permanent erosion control measures, including seeding and wattles shall be installed as soon as construction in these areas has been completed.

MAINTENANCE PLAN

All disturbed areas, erosion and sediment controls will be checked after each significant rainfall but not less than once per week. Any necessary repairs will be made to these controls within 24 hours. All vegetative areas will be maintained to provide proper ground cover and reseeded as needed.

I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gathered and evaluated the information submitted.
