2.3 SWPPP Objectives

The objective of the storm water program is to control water pollution associated with storm water discharges, and the goal of the storm water program is to improve water quality by reducing the amount of pollutants contained in storm water runoff from industrial sites. Industrial facilities subject to the requirements of a NPDES storm water discharge permit must prepare and implement a SWPPP. The objectives of the SWPPP are to:

- Identify potential sources of pollution and associated risk, which may affect the quality of storm water discharges;
- Describe best management practices (BMPs) and control measures intended to minimize pollutants in the facility's runoff; and
- Provide practical guidance for implementing the SWPPP and complying with the terms and conditions of the Storm Water General Permit.

2.4 SWPPP Elements

In order to meet the requirements of the Storm Water General Permit, the subsequent sections of the SWPPP contain the following elements:

- Section 3.0: Facility Information** – Describes site characteristics, facility operations, site security, and site drainage.
- Section 4.0: Storm Water Pollution Prevention Team** – Facility personnel identified as being responsible for implementing, maintaining, and revising the plan.
- Section 5.0: Significant Exposed Materials and Control Measures** – Identifies and describes
