# DOCUMENTATION OF COMPLIANCE WITH OTHER REGULATIONS/REQUIREMENTS

Coverage under this general permit will not be granted until all other required MDEQ permits and approvals are addressed.

WILL THE CONSTRUCTION OR OPERATION OF THIS MINE INVOLVE THE RE-ROUTING, FILLING OR CROSSING OF A WATER CONVEYANCE OF ANY KIND?  YES  NO

If yes, contact the U.S. Army Corps of Engineers' Regulatory Branch for permitting requirements. If the mine requires a Corps of Engineers Section 404 permit, provide appropriate documentation with this MNOI that:

- The mine has been approved by individual permit, or
- The work will be covered by a nationwide permit and NO NOTIFICATION to the Corps is required, or
- The work will be covered by a nationwide or general permit and NOTIFICATION to the Corps is required.

LIST ANY NPDES PERMIT NO(s) \_\_\_\_\_ GEOLOGY APPLICATION/PERMIT NO. \_\_\_\_\_

LIST OTHER GEOLOGY PERMIT NUMBERS THAT APPLY TO COVERAGE AREA \_\_\_\_\_

IS THE MINE LESS THAN 4 ACRES AND GREATER THAN 1320 FEET FROM ANOTHER MINE?

YES A "Notice of Exempt Operations" Form must be included with the MNOI or proof of prior submission, if previously submitted to the Office of Geology.

NO A "Notice of Intent to Mine Class I or Class II Materials" Form must be filed before coverage will be granted under the Mining General Permit. For information on Office of Geology requirements, call 601-961-5527.

LIST ANY LOCAL STORM WATER ORDINANCES WITH WHICH THE OPERATIONS MUST COMPLY AND SUBMIT ANY

ASSOCIATED APPROVAL DOCUMENTATION. \_\_\_\_\_

IF AN IMPOUNDMENT WILL BE CONSTRUCTED ABOVE NATURAL SURFACE ELEVATIONS, INDICATE WHICH, IF ANY, OF THE FOLLOWING APPLY.

The impoundment will be constructed with a peripheral dam or levee 8 feet or greater in height, measured from the lowest elevation of its toe.

The impoundment will have a maximum storage volume greater than 25 acre-feet.

The impoundment will impound a watercourse with a continuous flow.

The impoundment has the potential to threaten downstream lives or man-made structures.

If the impoundment meets any of the above criteria, the applicant will be required to obtain written authorization from MDEQ, Dam Safety Division before coverage will be granted under the Mining General Permit.

I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gathered and evaluated the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations.

**STORM WATER POLLUTION PREVENTION PLAN (SWPPP)**

**ENIS MINE WILKINSON COUNTY**

**SITE INFORMATION**

This site will be used as a dirt pit for road projects in Wilkinson County. Access to site will be on existing roadways. The site is located Section 13, TS 2-N, R 2-W, R1-W. Lat. 31-13' 43.10". Long. 91-27' 44-90".

**SEDIMENT AND EROSION CONTROLS**

**Vegetative controls:** A 200 (two hundred) foot vegetative buffer zone consisting of grass and trees will be maintained at all sides of property where runoff will be flowing. Existing trees will be preserved where possible. Any disturbed areas that will be left undisturbed for 30 (thirty) days will be seeded (temporary seeded) within 7 (seven) calendar days. After final grading all disturbed areas will be seeded (permanent seeding) within 7 (seven) calendar days.

**Structural Controls:** Brush Barriers and silt fence will be placed on all sides of the property where storm water runoff will be directed. A construction entrance will be built and any accumulation of mud on vehicle tires will be washed as needed, during muddy conditions. Road will be swept also, if needed, during muddy conditions.

**Housekeeping practices:** All equipment maintenance and repair will be done off site. Trash bags will be stored in supervisors' pick-ups. No toxic materials will be stored on this site. Portable sanitary facilities will be provided for construction workers.

**Post construction Control Measures:** Upon completion of construction, pit area will be nearly level, which will be grassed immediately to combat post construction erosion.

**IMPLEMENTATION SEQUENCE**

1. Build construction entrance/exit
2. Silt fence/Brush Barriers placed on all sides
3. Finish grading the pit and slopes
4. Seed site (permanent seeding)
5. After site is stabilized and grass growing, all silt fence will be removed.

**MAINTENANCE PLAN:** Check all disturbed areas, erosion and sediment controls after each significant rainfall but not less than one per week. Make needed repairs within 24 (twenty four) hours. Maintain all vegetated areas to provided proper ground cover-reseed, fertilize, and mulch as needed.
