This is only required if construction activity including clearing, grading, and excavation, results in the disturbance of five acres or more of land. Activity less than five acres is also included if part of a common plan of development or sale with a planned disturbance of 5 acres or more.
- A list of water treatment chemicals, if added to the fill water. The applicant must provide the following information for each specific chemical: Material Safety Data Sheet (MSDS), composition of the additive, expected discharge concentrations, dosage addition rates, frequency of use, EPA registration (if applicable), and aquatic species toxicological data. There shall be no chemical additives containing any priority pollutants listed in 40 CFR 122, Appendix D, Tables II and III.
